

Esthetic Crown Lengthening #6-11 with Crowns

Background: Barbara had periodontal disease which caused the pre-existing spaces between her teeth to increase. She wanted to regain health and also close the spaces between her teeth for a more esthetic outcome. Barbara had numerous procedures, please ask Dr. Kubikian if you have more questions.

Testimonial: "My treatment plan with Dr. Kubikian was over a two year period. This gave me ample opportunity to observe him as a person and doctor. He is a very personable and caring. I observed that he was highly thought of and liked by the other doctors. I always felt that he was genuinely invested in my care. He was mindful and respectful of time and therefore prompt. He often followed up a visit with a call to check on my well being. I recommend him highly." B.T.- Philadelphia, PA
