

Implant Overdenture- Mandible

Background: “NG was unhappy with the support of her mandibular denture and desired implants for both retention and stability.”

Mandibular Denture

This bar is permanently connected to two implants

Implant Overdenture is Seated on Implant Bar

Testimonial: “It was a very long 6 months, but the end result was significantly worth every minute I had to wait. I was 35 when I had all of my teeth removed and have worn a denture for 30+ years. For the first day or two, I was apprehensive about biting into something, afraid it wasn’t going to work. Now they’re fantastic, it’s the only way to go.”
