

Implant #8 with Crown

Background: TB had advanced decay on tooth #8 and it could no longer be restored. He chose to replace tooth #8 with a dental implant.

At Presentation #8

Patient is wearing an essix appliance during integration of implant #8

Testimonial: "It takes patience and perseverance, but it is worth it in the end and I don't have to worry about it. I don't remember any pain, I didn't even know you had pulled my tooth."
